UNION STOCKYARDS, INDIANAPO-LIS, April 30.-Cattle-Receipts, 800; shipments small. The receipts of cattle were comparatively liberal for a Tuesday market, and in harmony with other places the bidding was lower in the steer line. Salessions, but finally were forced to take off about 10c, compared with last Friday. The demand for good female butcher cattle was equal to the supply, and with rather active competition a good clearance was made early at quotably steady prices. The best steers sold at \$5.30, 1,089-lb kinds brought \$4.80, full loads of heifers sold as high as \$4.85, and the top price for cows was \$4.50.

trade elsewhere encouraged salesmen to be

slow in making concessions, and the open ing was quiet. Later, however, with local packers free and liberal buyers the offerngs were changing hands promptly, and a good clearance was made in good season at an average decline of about 21/2c in prices, compared with yesterday. The market was weakest for the ordinary light mixed hogs, and in a number of instances sales were considered 5c lower than yesterday. The market closed steady at the decline. Sales ranged from \$5.65 to \$5.821/4. and a very large proportion of the supply sold above \$5.75. Quotations:

Such statistics as these convey the truest

present market. Any attempt to description would resolve itself largely into an action of superlatives. There were long strings of successive transactions in some of the most active stocks in which none of the sales reported were of less than 1,000 shares and running from that up to 10,000 shares. If any ordinary considerations could rule in such a market the fact would have had great influence that the stocks which were most notably strong Monday were sold in enormous volume to take profits. The sharp break at many points in the closing dealings would have been another factor making for hesitation. But these usual symptoms of a coming reaction have been so recent extraordinary market that they were totally ignored by the excited speculators, as many other incidents have been, such as the engagements of gold for export and occasional hardening of the money market. The presence in great force of a widespread public interest in the market must explain this ignoring of usual tech- \$11,25@12.25. nical indications. The great accumulations of wealth which have come to the hands of the American people for several years estimated: left over, 2,000. Market opened a of the American people for several years shade higher and closed slow. Top. \$5.90: mixed past and which have lain in deposit banks waiting for opportunity for outlay seemed to be pouring into Wall street, attracted by the sudden great fortunes which are being made from day to day. The large inflow of money from the interior to New York seems to be due to this tendency, and in keeping the money market

easy in spite of the demand from other sources. There is very little in the way of specific news accompanying the movement of prices. The announcement yesterday morning of the absorption of the Leyland steamship line by J. P. Morgan had a tendency to give a renewed stimulus to the speculation as indicating the continued activity of the most influential individual in the recent great movement towards consolidation. The belief in wholesale consolidations of great railroad systems, even at enormous expense, involved in the buying factor in the general speculation. The enthusiastic believers in an indefinite rise in prices argue that the market turnover within a few days of as many shares of the corporation as the whole outstanding capital necessarily indicates a movement to buy control, but it is certainly obvious that a turnover of that amount of stock, where the actual control does not pass, is proof positive of an enormous purely speculative buying. It may be due to buying and sellpersistent short selling on every advance

and then buying to cover as the further advance imperils the position of the bears. That such purely speculative transactions formed a large factor in yesterday's market is probably not seriously doubted. An analysis in detail of the day's market would be futile, so great is its extent and variety, and, in the later dealings, its irregularity. Northern Pacific was under pressure of profit-taking all day and Union its influence as the day progressed. The Atchisons were the new strong feature on talk of an increase in the dividend. SPECULATIVE TRADE IN CEREALS COMPARATIVELY LIGHT.

Wheat Easy and Lower, Corn and Oats Fractionally Higher-Small Changes in Hog Products.

CHICAGO, April 30 .- Speculative markets on 'Change inclined to duliness. Wheat closed 1494c to 1494c lower, corn 4c to 4c higher, oats unchanged to 4c higher and provisions without material change.

The market opened weak under depress-

ing cables for both spot and future. Advices from the continent were that a great deal of wheat bought within the last few days was offered for resale. The bear situation was of brief duration, however. A decrease in the world's visible supply of 3,demand caused a sharp advance. Later the close was easy. During the last half hour the demand was largely from the short interest, which has been nervous be- 14,000 bu. cause of reports of fly in Ohio, and a revival of a moderate cash demand. Many Make to wake lower at 72% to 72%, rallied to 72%c, and later reacted to 73%c, closing easy at 73%c. May opened %@%c lower at 71%c, sold off to 71%c and railled to 72%c, closing \4@\c lower. Seaboard clearances in wheat and flour were equal to 332,000 bu. Primary receipts were 407,000 bu. Local receipts were 98 cars, none of contract grade, Minneapolis and Duluth reported 183 cars, against 194 last week and 356 a year ago. Corn opened weak on good weather, liberal country offerings, lower cables and in sympathy with wheat. The local buil element was the sole support of the market, with the general commission houses selling. July opened 44% lower at 44% a 44%c, rose to 45c, selling with narrow fluctu-Bananas-Per bunch, No. 1, \$1.75@2; No. 2, \$1.25 ations to 44%@44%c. Subsequently a bull

Climate and Crop Bulletin. The Indiana climate and crop bulletin for the week ending April 30 contains the folwere followed by warmer, fair and sunny

"Cool weather and rains until the 24th weather. Wheat, rye, clover, timothy, pasturage and meadows improved much and are in fine condition. Tobacco plants are coming up. Oats and barley are nearly all sown. Oats are coming up nicely in some fields. The ice and frost on the 19th and 20th did but little damage, as in many orchards, peaches, plums, cherries and apricots are in bloom, and other fruit bude are swelling. A few tomato plants were injured in the northern portion. Most gardens are made and nearly all of the early potatoes planted. Plowing for corn was delayed by the rains, but advanced rapidly during the latter part of the week. In a few fields corn has been planted. Sheep shearing began in the southern portion Floods in the Obio river bottoms destroyed much of the wheat.'
